Rohan Punjani

FULL STACK DEVELOPER | 3D MODEL DESIGNER

PROFILE

Rohan Punjani loves to design and code beautifully simple solutions for seemingly difficult problems, He is fond of the popular poem by Charles Bukowski "Go all the way" which always gives goosebumps. He also loves anime and tries to implement Asta's never-give-up attitude. He practices this approach everywhere in his projects and attempts to challenge his limits.

EXPERIENCE

● **Full Stack Developer Intern**
NELUMBUS TECH   4th August 2020 - 4th December 2020
Strengthened the present workflow system by adding a workshop management system, quiz management system, event management system, and a personalized dynamic certificate generation system. Discovered a lot within a very short interval of time and was introduced to the speed of the corporate world, where requirements change quickly and fulfill it even much faster.

● **AR Modelling Intern**
ENABLAR   18th April 2020 - 20 November 2020
Modeled multiple 3D objects for young kids to learn concepts using Augmented Reality Applications. Adapted Blender 3D 2.8 as a creation suite for building 3D low poly models and Unity 3D for animations and testing of corresponding models.

● **Full Stack Developer**
RAMRAO ADIK INSTITUTE OF TECHNOLOGY [PROJECT INTERN]   January 2020 - March 2020
Scaled a pre-existing project by adding multiple functionalities using reusable, robust components. Enhanced the User Experience using MaterializeCSS. Defined multiple user roles with corresponding access control.

● **Lead Developer**
SRIJAN – NATIONAL LEVEL PROJECT MAKING COMPETITION   January 2019
Developed a software named "CroCon" that detects the number of faces found in a video and categorizes it into different categories based on time, location, and frequency. The journey of Constant Development started with this competition.
